PROJECT GUIDE

Mrs. M. Jagadheswari

ABSTRACT

- Service Hub Directory is a web-based application that connects customers with reliable local service providers such as electricians, plumbers, carpenters, beauticians, tutors, photographers, and computer technicians.
- It offers a centralized platform where users can search for services, view provider details, and submit service requests, while providers can register, manage profiles, and respond to requests efficiently.
- Users receive gift vouchers or discount coupons after completing 10 service requests, encouraging them to use the platform again.

INTRODUCTION

- **Service Hub Directory** is a web-based platform that helps users find local service providers in one place.
- Users can search for services such as **plumbers, electricians, tutors, beauticians, photographers, and computer technicians** and view their details.
- Service providers can **register, manage their profiles, and respond to customer requests** through the platform.
- Users can also earn **gift vouchers or discount coupons after completing 10 service requests**, encouraging them to use the platform regularly.

4 MODULE DESCRIPTION

- **User Management Module**
Allows users to register, log in, manage their profile, search for services, and send requests.
- **Service Provider Management Module**
Allows providers to register, manage their profiles, add services, and handle customer requests.
- **Service Category Module**
Organizes services into different categories, making it easy for users to find the service they need.
- **Service Request Module**
Allows users to send service requests and providers to accept or reject requests and update their status.

MODULE 1

User & Provider Management

- Allows users to create an account and log in securely.
- Users can update and manage their personal profile.
- Users can browse different service categories.
- Users can search for service providers based on their needs.
- Users can submit service requests to selected providers.

MODULE 2

Service Provider Management Module

- Allows service providers to register on the platform.
- Providers can create and update their service profiles.
- They can add details such as service type, location, and contact information.
- Providers can view customer service requests.
- They can accept or reject requests based on their availability.

MODULE 3

Service Category Module

- Organizes available services into different categories.
- Helps users easily find the service they need.
- Categories can include **Electrician, Plumber, Carpenter, Beautician, Tutor, Photographer, and Computer Technician.**
- Users can select a category and view the available providers.
- The module makes service searching faster and easier.

Conclusion

Service Hub Directory provides a simple and convenient platform that connects customers with local service providers. Users can easily search for services, view provider details, and submit service requests, while providers can manage their profiles and respond to customer requests. The review and rating system helps users choose reliable providers, and the loyalty rewards system encourages repeated use of the platform. Overall, the project makes finding and managing local services easier, faster, and more efficient.

THANK YOU
